Nomination # <u>93 296</u>	<u>Samal Shoa</u>	<u>10-19-92</u>
Revision Year: _____	Regional Supervisor	Date
Revision to: Atlas _____ Catalog _____	<u>Ed Weiss</u>	<u>2/1/93</u>
Both <u>X</u>	<u>Ed Weiss</u>	<u>2/1/93</u>
Revision Code: <u>D-1</u>	Drafted	Date

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous

Provide any clarifying information, including number of fish observed, location of fish survey data, etc. Attach a copy of the fish survey data, if available. Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls.

Comments:

THIS CREEK DOES NOT CONNECT TO THE OTHER CREEK OR THE LAKE, THE USGS MAP IS IN ERROR. THE CREEK ACTUALLY OBTAINS MOST OF ITS WATER FROM A TRIBUTARY WHICH DRAINS THE HILL SIDE TO THE SOUTH

SUBJ: Dr. Michael Creek

After further review of the atlas and my nomination for a change, the correction I submitted is correct. The stream was cataloged to its confluence with Wolf Creek, just below the outlet to Wolf Lake. The USGS quad map is in error, Dr. Michael Creek does not originate from Wolf Creek. The branch of Dr. Mike in question originates as a muskeg seep from an area to the southeast of Wolf Lake, therefore any cataloging of the stream along the reach below Wolf Lake/Creek is in error. The main branch of Dr. Mike Creek, as stated before, drains the area to the south. Jim Durst and I will be submitting more information regarding this branch, and the results of electro-shocking in this area.
